

ADS 80/2 box weigher

Dosing System **ADS 80/2 Crate Feeder** with weighing unit

Input Device for Dosing Process Control.
Products from 0,100 - 8,00 kg can be handled

The new **ADS-80/2** Crate Feeder is designed for soft fruit, stone fruit and other bulk goods. The fruit is directly fed into the trays via funnel and Dosing Belt. This does avoid unfavourable drop height, and a very high dosing accuracy can be accomplished.

This system comes along with weighing platform, where crates or trays with holder can be positioned. Putting a crate onto the platform triggers the start of the dosing process (via special detectors). When this process is finished, the full crate gets replaced by an empty one and a new dosing process gets started.

All fruit handling equipment can be set up in line with individual Customer requirements, due to our **modular construction system**.

Main characteristics

The tray belt can handle trays up to max.
(L x W x H) 210 x 125 x 75 mm.

- Exit for sorting belt control

Technical details

Height of funnel: ca. 1180 mm
Height of tray conveyor: ca. 820 mm

Width: ca. 1000 mm w/o Conveyor
Length: ca. 3000 mm

Voltage: 230 Volt
Weight: ca. 180 kg
